PROBLEM SOLUTION FIT

The job seekers	Network connection, the system recommends the jobs with bias, then sometimes user will be landing into wrong deals.	Daily job alert emails notify candidates of new job posts relevant to their search and user can improve our ability to learn new skills.
provide the job information to the job seekers in which companies are currently hiring and they get a all job opportunities.	As new jobs are added every second, job posts have high competition and sometimes it has network issues.	calculate usage and benefits, users spend free time on volunteering work. need to get updated about the job opportunities.
people are facing difficulties in finding suitable job and peoples are stressing about being unempolyed our websites will be helps them find their jobs.	It's to create websites that provide opportunities for all job seekers. we are proposing an application which will help the job seekers to give suggestions on the jobs based the skills.	the job seekers will be at the home searching for the job which suits them.
Job is most improtant in current situations. For many people, Job's are tied to thier feeling of self-worth.
